## Math 20550 - Calculus III Fall 2015 Tutorial Info

Teaching Assistant	:	Edward Burkard Hurley 205
Office Hours	•	Tuesday 12:00-13:00 and Thursday 11:00-12:00 drop in and by appointment
E-mail	:	eburkard+Teaching@nd.edu
Webpage	:	nd.edu/~eburkard/?page=Teaching/20550F15
Section 41 - Thursday	12	:30-13:20
Location : O'Shaughnessy 116		
Section 42 - Thursday	15	:30-16:20
Location : Riley 200		

The main course webpage is: nd.edu/~sstarche/Math20550/index.html

Course Catalog Description : A comprehensive treatment of differential and integral calculus of several variables. Topics include space curves, surfaces, functions of several variables, partial derivatives, multiple integrals, line integrals, surface integrals, Stokes' theorem, and applications.

## Information:

- (1) There will be a total of 10 points issued over the course of tutorial, more or less, one for each tutorial which you attend and participate in. The criterion for participation is basically that you are doing what you're supposed to be: paying attention to lecture if there is one that day (see below) or working on the worksheet for the day (and not working on work for other classes). It is in your best interest to attend every tutorial.
- (2) While attendance is not strictly mandatory (you will not get points for days you do not attend, unless you have a valid excuse), on 8/27 and 9/24 new material will be covered in tutorial, so you need to attend these days.
- (3) To take attendance, I will pass out little slips for you to write your name on and turn in. If you have an excused absence, and can prove it, you will be given the point for the day you missed.
- (4) Should you want to compute your current class grade at any time, a running total of your attendance points will be maintained on the Sakai page for this tutorial (NOT the main lecture page!).
- (5) A fair warning now, this class starts out rather easy, and becomes pretty difficult, in particular, starting week 2 of November, when we start vector calculus. Don't get too comfortable too soon!
- (6) Please silence your phones while in class. I don't care if you turn them off or not, but at the very least silence them. It is really distracting when a phone goes off in class.
